

INSPECTION COMPETENCES IN THE FIELD OF ENVIRONMENTAL PROTECTION

Inspectional supervision includes tasks to be performed by the state administration, namely the authorities of the state administration, Autonomous Province and local self-government units.

Jurisdiction *ratione materiae* of the inspection in the field of environmental protection is determined by regulations governing this field on: waste management, air protection, nature, water, fish resources, environmental noise protection, ionising and non-ionising radiation, chemicals and biocidal products, etc.

Under the laws in the field of environmental protection, inspectional supervision tasks are entrusted to the Autonomous Province and local self-government units.

Due to the scope and complexity of laws and bylaws in the field of environmental protection (17 laws and over 240 bylaws), the Environmental Inspection Department prepared the Table of Competences as a comprehensive and unified approach of the inspection competences.

The Table shall not replace statutory regulations, but is a tool to recognize in a more simple and easier manner jurisdiction *ratione materiae* at all levels of the inspectional supervision.

The objective of the Table of Competences is to provide support both to inspectors and all stakeholders and public to recognise in a more simple way jurisdiction *ratione materiae* at all levels of inspectional supervision.

Inspection competences in the field of environmental protection	Republic inspection	Provincial inspection	City, Town/ Municipal Inspection	NOTE
WASTE MANAGEMENT				
Control of the implementation and updating of Waste Management Plan and Waste Prevention Programme, for installations for which integrated permit is issued by the Ministry	•			
Control of the implementation and updating of Waste Management Plan and Waste Prevention Programme, for installations for which integrated permit is issued by the competent authority of AP Vojvodina		•		
Control of the implementation and updating of Waste Management Plan and Waste Prevention Programme, for installations for which integrated permit is issued by city, town/local self-government unit			•	

Control of the implementation and updating of Waste Management Plan and Waste Prevention Programme with producers of hazardous waste	•			
Control of the implementation and updating of Waste Management Plan and Waste Prevention Programme with producers of hazardous waste in the territory of AP Vojvodina		•		
Control of the implementation and updating of Waste Management Plan and Waste Prevention Programme with producers of inert and non-hazardous waste			•	
Control of the implementation and updating of Work Plan of waste management facility, for which permit was issued by the Ministry	•			
Control of the implementation and updating of Work Plan of waste management facility, for which permit was issued by the competent authority of AP Vojvodina		•		
Control of the implementation and updating of Work Plan of waste management facility, for which permit was issued by competent authority of city, town/local self-government unit			•	
Control of fulfilment of conditions for handling of production residue as by-products, and possessing documents evidencing the fulfilment of the stipulated conditions	•			
Control of fulfilment of conditions for the termination of waste status and technical requirements for certain types of waste with termination of waste status	•			
Control of application and usage of adequate technologies and efficient use of raw materials and energy in installations, for which construction permit, i.e. exploitation permit, is issued by Republic authority	•			
Control of application and usage of adequate technologies and efficient use of raw materials and energy in installations, for which construction permit, i.e. exploitation permit, is issued by competent authority of AP Vojvodina		•		

Control of application and usage of adequate technologies and efficient use of raw materials and energy in installations, for which construction permit, i.e. exploitation permit, is issued by competent authority of city, town/ local self-government unit			•	
Control of waste management in installations generating hazardous waste and implementation of measures and procedures for reducing their quantities or dangerous properties	•			
Control of waste management in installations generating hazardous waste and implementation of measures and procedures for reducing their quantities or dangerous properties, in the territory of AP Vojvodina		•		
Control of waste management in installations where non-hazardous waste is generated and implementation of measures and procedures for reducing their quantities			•	
Control of activities of collection, transport, storage, treatment, recovery and disposal of hazardous waste, treatment of inert and non-hazardous waste by incineration and treatment of waste in a mobile facility, for which permits are issued by the Ministry	•			
Control of activities of waste collection, transport, storage, treatment, recovery and disposal, for which permits are issued by competent authority of AP Vojvodina		•		Except for the control of waste treatment in mobile installations and treatment of inert and non-hazardous waste by incineration
Control of activities of collection, transport, storage, treatment, recovery and disposal of inert and non-hazardous waste, for which permits are issued by competent authority of city, town/local self-government unit			•	
Control of conditions specified in the permit for performing business activity in the field of waste management (technical characteristics, capacities, operating of the facility, monitoring, measures), for permits issued by the Ministry	•			

Control of conditions specified in the permit for performing business activity in the field of waste management (technical characteristics, capacities, operating of the facility, monitoring, measures), for permits issued by competent authority of AP Vojvodina			•	
Control of conditions specified in the permit for performing business activity in the field of waste management (technical characteristics, capacities, operating of the facility, monitoring, measures), for permits issued by competent authority of city, town/local self-government unit				•
Control of fulfilment of conditions for operating of the facility for waste storage, treatment and disposal, for which permit is issued by the Ministry	•			
Control of fulfilment of conditions for operating of the facility for waste storage, treatment and disposal, for which permit is issued by competent authority of AP Vojvodina			•	
Control of fulfilment of conditions for operating of the facility for waste storage, treatment and disposal, for which permit is issued by competent authority of city, town/local self-government unit				•
Control of handling of hazardous waste during its collection and transport, i.e. during its movement	•			
Control of handling of hazardous waste during its collection and transport, i.e. during its movement in the territory of AP Vojvodina			•	
Control of handling of inert and non-hazardous waste, except for household waste, during its collection and transport, i.e. during its movement				•
Control of handling of waste in cross-border movement (import, export and transit of waste)	•			
Control of fulfilment of conditions for operating of the facility for waste disposal, particularly supervision of the location before beginning the operation of waste disposal, for which permit is issued by the Ministry	•			

Control of fulfilment of conditions for operating of the facility for waste disposal, particularly supervision of the location before beginning the operation of waste disposal, for which permit is issued by competent authority of AP Vojvodina			•	
Control of fulfilment of conditions for operating of the facility for waste disposal, particularly supervision of the location before beginning the operation of waste disposal, for which permit is issued by competent authority of city, town/local self-government unit				•
Control of closing down and recultivation of existing landfills and supervision over the landfill after its closing	•			For projects of remediation, closing and recultivation of landfills, for which approval is given by the Ministry
Control of closing down and recultivation of existing landfills and supervision over the landfill after its closing, in the territory of AP Vojvodina			•	For projects of remediation, closing and recultivation of landfills, for which approval is given by competent authority of Autonomous Province
Control of the procedures of hazardous waste classification, storage, packing, labelling and transport	•			
Control of the procedures of hazardous waste classification, storage, packing, labelling and transport, in the territory of AP Vojvodina			•	
Control of products becoming flows of specific waste (waste streams) after use	•			
Control of products becoming flows of specific waste (waste streams) after use, in the territory of AP Vojvodina, except import of products becoming flows of specific waste (waste streams) after use			•	
Control of handling of waste in accordance with stipulated obligations concerning waste stream management	•			
Control of handling of waste in accordance with stipulated obligations concerning waste stream management, in the territory of AP Vojvodina			•	

Control of handling of waste tires in accordance with stipulated obligations concerning waste stream management			•	
Control of the implementation of stipulated measures and procedures for the prevention of accidents and in case of accidents, specified in permits issued by the Ministry	•			
Control of the implementation of stipulated measures and procedures for the prevention of accidents and in case of accidents, specified in permits issued by competent authority of AP Vojvodina		•		
Control of the implementation of stipulated measures and procedures for the prevention of accidents and in case of accidents, specified in permits issued by competent authority of city, town/local self-government unit			•	
Control of work of the person responsible for hazardous waste management	•			
Control of work of the person responsible for hazardous waste management, in the territory of AP Vojvodina		•		
Control of work of the person responsible for inert and non-hazardous waste management			•	
Control of work of qualified person responsible for expert work in the waste management facility, for which permit is issued by the Ministry	•			
Control of work of qualified person responsible for expert work in the waste management facility, for which permit is issued by competent authority of AP Vojvodina		•		
Control of work of qualified person responsible for expert work in the waste management facility, for which permit is issued by competent authority of city, town/local self-government unit			•	
Control of keeping and maintenance of regulated records on hazardous waste management with producers of waste	•			

Control of keeping and maintenance of regulated records on hazardous waste management with producers of waste, in the territory of AP Vojvodina		•		
Control of keeping and maintenance of regulated records on inert and non-hazardous waste management with producers of waste			•	
Control of keeping and maintenance of regulated records on waste management and submission of regulated reports on waste, for installations for which permit was issued by the Ministry	•			
Control of keeping and maintenance of regulated records on waste management and submission of regulated reports on waste, for installations for which permit was issued by competent authority of AP Vojvodina		•		
Control of keeping and maintenance of regulated records on waste management and submission of regulated reports on waste, for installations for which permit was issued by competent authority of city, town/local self-government unit			•	
Control of keeping and maintenance of regulated records on flows of specific waste (waste streams)	•			
Control of keeping and maintenance of regulated records on flows of specific waste (waste streams) in the territory of AP Vojvodina		•		
Control of keeping and maintenance of regulated records on waste tires			•	
Control of business operations with agents in waste management and waste traders	•			
Control of municipal waste management			•	
PACKAGING AND PACKAGING WASTE				
Control of collection, transport, storage, treatment and disposal of packaging waste	•			
Control of collection, transport, storage, treatment and disposal of packaging waste in the territory of AP Vojvodina		•		

Control if producers, importers, packers/fillers, suppliers or end users act in accordance with permit for own packaging waste management, or they have transferred their obligation to the operator	•			
Control of packaging waste management with producers, importers, packers/fillers, suppliers or end users that do not have a permit for own packaging waste management	•			
Control of packaging waste management with producers, importers, packers/fillers, suppliers or end users that do not have a permit for own packaging waste management, in the territory of AP Vojvodina			•	
Control if the operator of the packaging waste management system acts in accordance with the permit	•			Permit for the operator of the packaging waste management system is issued by the Ministry
Control if the operator of the packaging waste management system has organised one or more centres for collection, classification and temporary storage of packaging waste	•			
Control if the operator of the packaging waste management system informs the public and end users in accordance with law	•			
Control if producers, importers, packers/fillers, suppliers or end users submit annual reports on packaging and packaging waste management	•			
Control if producers, importers, packers/fillers, suppliers or end users submit annual reports on packaging and packaging waste management, in the territory of AP Vojvodina			•	
Control of installations for treatment and disposal of packaging waste, for which permit is issued by the Ministry	•			
Control of installations for treatment and disposal of packaging waste, for which permit is issued by competent authority of AP Vojvodina			•	

Control of installations for treatment and disposal of packaging waste, for which permit is issued by competent authority of city, town/local self-government unit			•	
Control of handling of packaging waste contaminated by dangerous or other substances	•			
Control of handling of packaging waste contaminated by dangerous or other substances in the territory of AP Vojvodina		•		
Control of conditions for environmental protection to be fulfilled by the packaging in order to be placed on the market				Control of placing packaging on the market is performed by the Ministry of Trade, through market inspectors
ENVIRONMENTAL IMPACT ASSESSMENT				
Control of fulfilment of the obligation of submission of application for obtaining approval of impact assessment/As-Is status for projects for which environmental impact assessment is mandatory, for which approval for construction projects is issued by competent Republic authority	•			
Control of fulfilment of the obligation of submission of application for obtaining approval of impact assessment/As-Is status for projects for which environmental impact assessment is mandatory, for which approval for construction projects is issued by competent authority of AP Vojvodina		•		
Control of fulfilment of the obligation of submission of application for obtaining approval of impact assessment/As-Is status for projects for which environmental impact assessment is mandatory, for which approval for construction projects is issued by competent authority of city, town/local self-government unit			•	

Control of fulfilment of the obligation of submission of application for deciding on the need on environmental impact assessment for projects, for which impact assessment may be applied for, for which approval for construction projects is issued by competent Republic authority	•			
Control of fulfilment of the obligation of submission of application for deciding on the need on environmental impact assessment for projects, for which impact assessment may be applied for, for which approval for construction projects is issued by competent authority of AP Vojvodina		•		
Control of fulfilment of the obligation of submission of application for deciding on the need on environmental impact assessment for projects, for which impact assessment may be applied for, for which approval for construction projects is issued by competent authority of city, town/local self-government unit			•	
Control of fulfilment of obligations of the project leader from the Impact Assessment Study/As-Is Status Study, on which the Decision on granting approval was adopted by the Ministry	•			
Control of fulfilment of obligations of the project leader from the Impact Assessment Study/As-Is Status Study, on which the Decision on granting approval was adopted by competent authority of AP Vojvodina		•		
Control of fulfilment of obligations of the project leader from the Impact Assessment Study/As-Is Status Study, on which the Decision on granting approval was adopted by competent authority of city, town/local self-government unit			•	

INTEGRATED PREVENTION AND CONTROL OF ENVIRONMENT POLLUTION

Control if the new installations, for which construction permit is issued by the Ministry, have integrated permit issued in accordance with Law on Integrated Prevention and Control of the Environment Pollution,	•			
Control if the new installations, for which construction permit is issued by competent authority of AP Vojvodina, have integrated permit issued in accordance with Law on Integrated Prevention and Control of the Environment Pollution		•		
Control if the new installations, for which construction permit is issued by competent authority of local self-government unit, have integrated permit issued in accordance with Law on Integrated Prevention and Control of the Environment Pollution			•	
Control if the existing installations, for which construction permit is issued by Ministry, have submitted an application for the issuance of integrated permit	•			
Control if the existing installations, for which construction permit is issued by competent authority of AP Vojvodina, have submitted an application for the issuance of integrated permit		•		
Control if the existing installations, for which construction permit is issued by competent authority of local self-government unit, have submitted an application for the issuance of integrated permit			•	
Control if the operations of the facility, for which construction permit is issued by the Ministry, are in accordance with conditions from the issued integrated permit	•			
Control if the operations of the facility, for which construction permit is issued by competent authority of AP Vojvodina, are in accordance with conditions from the issued integrated permit		•		

Control if the operations of the facility, for which construction permit is issued by competent authority of local self-government unit, are in accordance with conditions from the issued integrated permit,			•	
Control if the integrated facility informs the competent authority on each change in its operations, i.e. in functioning of the facility, for which construction permit is issued by the Ministry	•			
Control if the integrated facility informs the competent authority on each change in its operations, i.e. in functioning of the facility, for which construction permit is issued by competent authority of AP Vojvodina		•		
Control if the integrated facility informs the competent authority on each change in its operations, i.e. in functioning of the facility, for which construction permit is issued by competent authority of local self-government unit			•	

AIR PROTECTION

Control if the source of air pollution is designed, constructed, equipped, used and maintained in such a manner so as to keep emissions within regulated limits, for installations for which construction permit is issued by the Ministry	•			
Control if the source of air pollution is designed, constructed, equipped, used and maintained in such a manner so as to keep emissions within regulated limits, for installations for which construction permit is issued by competent authority of AP Vojvodina		•		
Control if the source of air pollution is designed, constructed, equipped, used and maintained in such a manner so as to keep emissions within regulated limits, for installations for which construction permit is issued by competent authority of local self-government unit			•	

Control if in case of exceedance of limit values and/or level of air pollutants, regulated, i.e. ordered measures have been undertaken, for installations for which construction permit is issued by the Ministry	•			
Control if in case of exceedance of limit values and/or level of air pollutants, regulated, i.e. ordered measures have been undertaken, for installations for which construction permit is issued by competent authority of AP Vojvodina		•		
Control Control if in case of exceedance of limit values and/or level of air pollutants, regulated, i.e. ordered measures have been undertaken, for installations for which construction permit is issued by competent authority of local self-government unit			•	
Control if the operator has obtained a permit for work of the stationary source of pollution before commencement of work, for installations for which construction permit is issued by the Ministry	•			
Control if the operator has obtained a permit for work of the stationary source of pollution before commencement of work, for installations for which construction permit is issued by competent authority of AP Vojvodina		•		
Control if the operator has obtained a permit for work of the stationary source of pollution before commencement of work, for installations for which construction permit is issued by competent authority of local self-government unit			•	
Control if the work of stationary source of pollution, or other activities, are performed contrary to the stipulated ban, for installations for which construction permit is issued by the Ministry	•			

Control if the work of stationary source of pollution, or other activities, are performed contrary to the stipulated ban, for installations for which construction permit is issued by competent authority of AP Vojvodina		•		
Control if the work of stationary source of pollution, or other activities, are performed contrary to the stipulated ban, for installations for which construction permit is issued by competent authority of local self-government unit			•	
Control if the operator has provided stipulated measurement of the emissions and/or level of pollutants in the air and if it keeps records on the performed measurement, for installations for which construction permit is issued by the Ministry	•			
Control if the operator has provided stipulated measurement of the emissions and/or level of pollutants in the air and if it keeps records on the performed measurement, for installations for which construction permit is issued by competent authority of AP Vojvodina		•		
Control if the operator has provided stipulated measurement of the emissions and/or level of pollutants in the air and if it keeps records on the performed measurement, for installations for which construction permit is issued by competent authority of local self-government unit			•	
Control if the operator keeps records on the type and quality of raw materials and fuel, for installations for which construction permit is issued by the Ministry	•			
Control if the operator keeps records on the type and quality of raw materials and fuel, for installations for which construction permit is issued by competent authority of AP Vojvodina		•		

Control if the operator keeps records on the type and quality of raw materials and fuel, for installations for which construction permit is issued by competent authority of local self-government unit			•	
Control if the operator keeps records on operating of devices for prevention or reduction of emissions of pollutants and emission measuring devices, and if these devices are set up and maintained, for installations for which construction permit is issued by the Ministry	•			
Control if the operator keeps records on operating of devices for prevention or reduction of emissions of pollutants and emission measuring devices, and if these devices are set up and maintained, for installations for which construction permit is issued by competent authority of AP Vojvodina		•		
Control if the operator keeps records on operating of devices for prevention or reduction of emissions of pollutants and emission measuring devices, and if these devices are set up and maintained, for installations for which construction permit is issued by competent authority of local self-government unit			•	
Control if tasks of emission measurement and monitoring air quality are performed in a regulated manner, for installations for which construction permit is issued by the Ministry	•			
Control if tasks of emission measurement and monitoring air quality are performed in a regulated manner, for installations for which construction permit is issued by competent authority of AP Vojvodina		•		
Control if tasks of emission measurement and monitoring air quality are performed in a regulated manner, for installations for which construction permit is issued by competent authority of local self-government unit			•	

Control if ozone depleting substances and fluorinated greenhouse gases as well as products containing these substances, or made with them, are handled in accordance with regulations	•			
Control if the tasks of servicing or decommissioning, i.e. recovery, recycling and reclamation of ozone depleting substances and fluorinated greenhouse gases, are performed by persons with a license, as well as if these persons fulfil the stipulated conditions	•			
Control if measures stipulated for production, release in the air, sales, import, export and use of ozone depleting substances and fluorinated greenhouse gases as well as products containing these substances, i.e. if permitted annual quantities are exceeded, and if these substance are used for permitted purposes	•			
Control if import and export of ozone depleting substances and fluorinated greenhouse gases are performed on the basis of a permit and if records are kept	•			
ENVIRONMENTAL NOISE PROTECTION				
Control if prevention, reduction and elimination of harmful effects of noise are performed in accordance with decision on determining noise protection measures adopted by the Ministry	•			
Control if prevention, reduction and elimination of harmful effects of noise are performed in accordance with decision on determining noise protection measures adopted by competent authority of AP Vojvodina		•		
Control if prevention, reduction and elimination of harmful effects of noise are performed in accordance with decision on determining noise protection measures adopted by competent authority of local self-government unit			•	

Control if noise measurement is performed in accordance with law, for activities and installations, for which construction permit is issued by the Ministry	•			
Control if noise measurement is performed in accordance with law, for activities and installations, for which construction permit is issued by competent authority of AP Vojvodina		•		
Control if noise measurement is performed in accordance with law, for activities and installations, for which construction permit is issued by competent authority of local self-government unit			•	
Control if noise levels within acoustic zone are above the regulated limit value			•	
Control if noise strategic maps are being developed	•			
Control if there are technical requirements for sources of noise during their exploitation, for activities and installations, for which construction permit is issued by the Ministry	•			
Control if there are technical requirements for sources of noise during their exploitation, for activities and installations, for which construction permit is issued by competent authority of AP Vojvodina		•		
Control if there are technical requirements for sources of noise during their exploitation, for activities and installations, for which construction permit is issued by competent authority of local self-government unit			•	
WATER PROTECTION				
Control if released waste water and waste water released after treatment into the recipient fulfil conditions as regards limit values determined in accordance with Water Law	•			

Control if released waste water and waste water released after treatment into the recipient fulfil conditions as regards limit values determined in accordance with Water Law, in the territory of AP Vojvodina		•		
Control if released waste water and waste water released after treatment into the recipient fulfil conditions as regards limit values determined in accordance with Water, in the territory of the City of Belgrade			•	
Control if for the protection of recipient water quality, bans in accordance with Water Law are applied	•			
Control if for the protection of recipient water quality, bans in accordance with Water Law are applied, in the territory of AP Vojvodina		•		
Control if for the protection of recipient water quality, bans in accordance with Water Law are applied, in the territory of the City of Belgrade			•	
Control if the obligation of examination of waste water is performed in accordance with Water Law	•			
Control if the obligation of examination of waste water is performed in accordance with Water Law, in the territory of AP Vojvodina		•		
Control if the obligation of examination of waste water is performed in accordance with Water Law, in the territory of the City of Belgrade			•	
Control if Action Plan for gradual reduction of limit values of pollutant emissions to water has been adopted, with determined time limits for their gradual reduction, and if actions are taken in compliance with the Action Plan	•			
Control if Action Plan for gradual reduction of limit values of pollutant emissions to water has been adopted, with determined time limits for their gradual reduction, and if actions are taken in compliance with the Action Plan, in the territory of AP Vojvodina		•		

Control if Action Plan for gradual reduction of limit values of pollutant emissions to water has been adopted, with determined time limits for their gradual reduction, and if actions are taken in compliance with the Action Plan, in the territory of the City of Belgrade				•	
---	--	--	--	---	--

SOIL PROTECTION

Control if performing certain activities or actions may cause soil pollution	•				
Control if performing certain activities or actions may cause soil pollution, in the territory of AP Vojvodina		•			
Control if waste waters are releasing polluting, harmful and dangerous substances into the soil or on the soil	•				
Control if waste waters are releasing polluting, harmful and dangerous substances into the soil or on the soil, in the territory of AP Vojvodina		•			
Control if rehabilitation, remediation and recultivation of polluted soil are performed in accordance with projects	•				
Control if the polluters perform monitoring of soil in accordance with law	•				
Control if the polluters perform monitoring of soil in accordance with law, in the territory of AP Vojvodina		•			
Control if the polluters have developed and submitted Reports on Soil Monitoring to the Ministry and Environmental Protection Agency	•				
Control if the polluters have developed and submitted Reports on Soil Monitoring to the Ministry and Environmental Protection Agency, in the territory of AP Vojvodina		•			

PROTECTION FROM NON-IONISING RADIATION

Control of sources of non-ionising radiation, for which approval for construction and commencement of work is issued by the competent ministry	•			
Control of sources of non-ionising radiation, for which approval for construction and commencement of work is issued by competent authority of the Autonomous Province		•		
Control of sources of non-ionising radiation, for which approval for construction and commencement of work is issued by competent authority of city, town/local self-government unit			•	
Control if a company, enterprise, other legal entity and entrepreneur fulfil the stipulated conditions for the use of sources of non-ionising radiation of special interest	•			
Control if a company, enterprise, other legal entity and entrepreneur fulfil the stipulated conditions for the use of sources of non-ionising radiation of special interest in the territory of Autonomous Province		•		
Control if a company, enterprise, other legal entity and entrepreneur, using sources of non-ionising radiation of special interest, keep records on these sources	•			
Control if a company, enterprise, other legal entity and entrepreneur, using sources of non-ionising radiation of special interest, keep records on these sources, in the territory of Autonomous Province		•		
Control if a company, enterprise, other legal entity and entrepreneur, using sources of non-ionising radiation of special interest, keep records on performed examination of non-ionising radiation	•			
Control if a company, enterprise, other legal entity and entrepreneur, using sources of non-ionising radiation of special interest, keep records on performed examination of non-ionising radiation, in the territory of Autonomous Province		•		

Control if a company, enterprise, other legal entity and entrepreneur, using sources of non-ionising radiation of special interest, have provided examination of non-ionising radiation in the environment	•			
Control if a company, enterprise, other legal entity and entrepreneur, using sources of non-ionising radiation of special interest, have provided examination of non-ionising radiation in the environment, in the territory of Autonomous Province		•		
Control if legal entities performing tasks of systematic examination of the level of non-ionising radiation in the environment fulfil the stipulated conditions	•			
Control if legal entities performing examination of the level of non-ionising radiation of special interest in the environment fulfil the stipulated conditions - determined by the Ministry	•			
Control if legal entities performing examination of the level of non-ionising radiation of special interest in the environment fulfil the stipulated conditions - determined by competent authority of Autonomous Province		•		
Control if a company, enterprise, other legal entity and entrepreneur, operator or manager have informed the Ministry on exceptional occurrence in a timely manner	•			
Control if a company, enterprise, other legal entity and entrepreneur, operator or manager have informed the competent authority of the Autonomous Province on exceptional occurrence in a timely manner		•		
Control if a company, enterprise, other legal entity and entrepreneur, operator or manager have informed competent authority of city, town/local self-government on exceptional occurrence in a timely manner			•	

CHEMICALS

Control of classification, labelling, packing, and advertising of chemicals and certain products, and control of content, update and submission of safety data sheets	•			
Control of registering chemicals in the Register of Chemicals, keeping the regulated records and collecting data on chemicals, as well as providing the chemicals advisor	•			
Control of submitting data on certain product and control of the use of the substance alternative names	•			
Control if actions are taken in accordance with bans and restrictions when chemicals are in question, i.e. products that are not consumer goods	•			
Control if actions are taken in accordance with regulated obligations when detergents are in question	•			
Control of the implementation of provisions governing the prior notification procedure, i.e. PIC procedure	•			
Control of placing on the market particularly hazardous chemicals with importers, producers i.e. further users, and control of measures and conditions in accordance with permits issued by the Ministry	•			
Control of placing on the market particularly hazardous chemicals with importers, producers i.e. further users, and control of measures and conditions in accordance with permits issued by local self-government units			•	
BIOCIDAL PRODUCTS				
Control if biocidal products are placed on the market without approval or decision of entry of biocidal product in the Temporary List	•			
Control if biocidal products are placed on the market and used in accordance with measures and conditions stipulated in the decision, instructions for use and information from Safety Data Sheet	•			

Control if biocidal products are classified, packed and labelled, if they have safety data sheet and if in the safety data sheet the manner and conditions for use of the biocidal product are mentioned, as well as control of keeping records on biocidal products	•			
Control if actions are taken in accordance with restrictions and bans as regards placing on the market and use of biocidal products, and if certain dangerous biocidal products, placed on the market as consumer goods, are placed on the market in accordance with regulations	•			
Control if before placing on the market, a temporary permit has been obtained, if the biocidal product is used under stipulated conditions, if the users are acquainted with the conditions for limited and controlled use and if reports with results of systematic monitoring of use for this biocidal product are submitted	•			
Control if for biocidal products used for scientific research and development, i.e. research and development oriented procedure, before placing on the market, certificate, i.e. permit in accordance with regulations, has been obtained	•			
CHEMICAL ACCIDENT PROTECTION				
Control of chemical accident protection in Seveso installations/establishments	•			Control of chemical accident protection in installations that are not Seveso installations/establishments, is within the competence of the Risk Management Department of the Sector for Emergency Situations of the Ministry of Interior

Control if the operator of Seveso installation/establishment possesses the prescribed documents and if it undertakes measures determined in these documents and related to the prevention of accidents and limiting the effects of the accident when human life and health and the environment are in question	•			
NATURE PROTECTION				
Control of fulfilment of conditions and implementation of measures for nature protection, other acts issued on the basis of law and other regulations in the field of nature protection.	•			
Control of fulfilment of conditions and implementation of measures for nature protection, other acts issued on the basis of law and other regulations in the field of nature protection in the territory of Autonomous Province		•		
Control of fulfilment of conditions and implementation of measures for nature protection, other acts issued on the basis of law and other regulations in the field of nature protection in protected areas declared by the competent local self-government unit.			•	
Control of the implementation of compensation measures.	•			
Control of the implementation of compensation measures in the territory of Autonomous Province.		•		
Control of the implementation of compensation measures in protected areas declared by the competent local self-government unit.			•	
Control of the implementation of the management plan and other acts of the protected areas.	•			
Control of the implementation of the management plan and other acts of the protected areas in the territory of Autonomous Province.		•		

Control of the implementation of the management plan and other acts of the protected areas in protected areas declared by the competent local self-government unit.			•	
Control of actions in the protected area contrary to the protection act	•			
Control of actions in the protected area contrary to the protection act in the territory of Autonomous Province.		•		
Control of works in the protected area declared by the competent local self-government unit, contrary to the protection act			•	
Control of the implementation of direct protection, conservation and use of protected natural goods	•			
Control of the implementation of direct protection, conservation and use of protected natural goods in the territory of Autonomous Province.		•		
Control of the implementation of direct protection, conservation and use of protected natural goods in the protected area declared by the competent local self-government unit.			•	
Control of the implementation of measures and conditions of the protected plant and animal species and fungi and mushrooms.	•			
Control of the implementation of measures and conditions of the protected plant and animal species and fungi and mushrooms in the territory of Autonomous Province.		•		
Control if the cross-border movement and trade in wild animal species and fungi and mushrooms is performed in accordance with laws and regulations passed on the basis of law.	•			
Control if trade in wild animal species and fungi and mushrooms is performed in accordance with regulations in the field of nature protection in the territory of Autonomous Province.		•		

Control if bringing to and bringing back of wild species to nature is performed in accordance with regulations in the field of nature protection.	•			
Control if bringing to and bringing back of wild species to nature is performed in accordance with regulations in the field of nature protection in the territory of Autonomous Province.		•		
Control if monitoring of nature status and its values is performed.	•			
Control if monitoring of nature status and its values is performed in the territory of Autonomous Province.		•		
Control if Register of Protected Natural Resources and Goods and other stipulated records are kept.	•			
Control if genetic material is used in accordance with this law and special regulations.	•			
Control if the genetic material is used in accordance with regulations in the field of nature protection in the territory of Autonomous Province.		•
